Customers who go quiet and call support are the ones who leave, especially on Basic

Churn rate = share of customers who left. Based on 10,000 customers after cleaning.

Churn climbs from 60% to 91% the longer a customer stays away

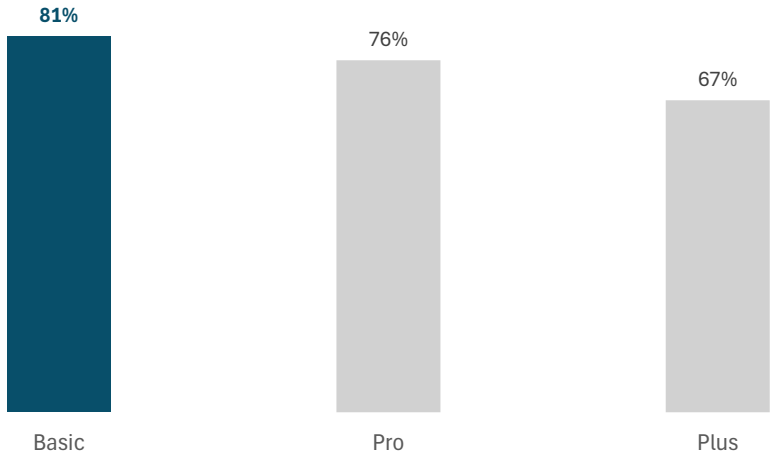

Churn rate by days since last login

Basic customers churn 14 points more than Plus

Churn rate by subscription plan

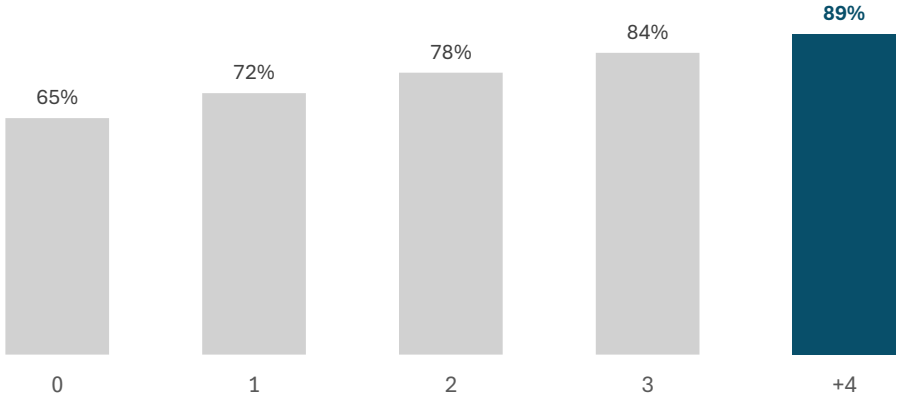

Overall churn = 76%

Customers with +4 support calls churn at 89%

Churn rate by number of support calls

+4 calls: about 1,115 customers

Note: This is a practice dataset, and the overall churn (76%) is unusually high. These patterns show association, not cause. Missing values were filled with medians.

What we would do

1. Contact customers who have not logged in for 30 days.
2. Check customers who called support 3 or more times.
3. Offer a retention deal to Basic customers.
